

C-IED EQUIPMENT

Search, deprive the enemy of his resources

MSYS-EOD is an innovative project relative to EOD equipments (individual protection suits, handheld detectors, X-Ray systems, Unmanned Ground Vehicles (UGV), etc.) with a global approach in an integrated system to provide a maximum efficiency and resilience during operations.

All key points of C-IED are covered :

- Defeat the device
- Prepare the Force
- Attack the Networks

Defeat the Device : EOD / IEDD teams

MSYS-EOD therefore provides the three branches of the armed forces with the first comprehensive EOD and C-IED equipment and systems solution, with the capacity for deployment in external theatres of operation. A dedicated robot is part of equipment. All the equipment can be transported in a container-type MTS (Mobile Technical Shelter), facilitating its deployment and storage on external theatres of operations, whilst also offering the possibility of on-site repairs

Exploder

Traction kit for conventional EOD operations

MOBILE TECHNICAL CONTAINER, DEPLOYMENT, TRANSPORTATION, STORAGE, WORK

CERTIFICATION & QUALITY

Our activities in the Defence involve perfect mastery of our management and product processes. Our various certifications demonstrate our desire for excellence in satisfying your needs.

- ISO 9001-2015
- ISO 3834-2
- EN 1090 EXC 4
- AQAP 2110 D
